

## Total CO2 Emissions:

Your current Planning Application process generates **369** kilograms per year.

Through your commitment to electronic planning you already save **721.8** kilograms per year.

By adopting a fully electronic process you could save a further **0** kilograms per year.

## Per app comparison:

**Paper application**  
12.12 Kgs CO2

**Average**  
6.3 Kgs CO2

**Your process**  
4.1 Kgs CO2

**Electronic application**  
4.1 Kgs CO2

## Real world comparison:

Your total CO2 is approximately the amount of CO2 produced by driving from London to Cardiff 7 times.

Your total CO2 is approximately the amount of CO2 produced by driving from London to Edinburgh 3 times.
